DETAILED ACTION

Response to Amendment

1. Claims 1-56 were pending in this application at the time of the previous Office Action. Claims 2-56 have been cancelled and new claims 57-75 added via the latest amendment. Therefore claims 1 and 57-75 are pending in this application and have been examined.

Response to Arguments

2. Applicant's arguments, see the amendment filed 3-14-2005, with respect to the double patenting rejection of claim 1 found in the previous Office Action has been fully considered and, taken together with the changes made to the language of the claims by the latest amendment, are persuasive to overcome the rejection.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2137

4. Claims 1, 57-60, 63-75 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 5,903,882. Although the conflicting claims are not identical, they are not patentably distinct from each other because they each claim identical methods, or computer program-products causing a computing device to carry out an identical method of managing reliance in an electronic transaction system. Claims 1, 58-60 and 63-65 are broader versions of claims 1-5 of the patent and are thereby rendered obvious by the narrower claims of the Patent.

Allowable Subject Matter

5. Claims 61 and 62 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure as it teaches features similar to the claimed invention.
